- \* Repairs to sewer laterals on King Street between Princess Street and Fulton Lane began this week and will maintain course next week.
- \* The electrical conduit work on Fulton Lane was completed this week and the affected stretch of street re-paved.
- \* Good progress is being made with the bluestone installation between Fulton Lane and Clifford Street. It could be completed soon and curb installation is planned for next week.
- \* The demolition of the east side of King Street between the Julia Santen Gallery(188) and A'Riga IV Antiques (204) is tentatively scheduled for next week.
- \* Sewer lateral repair work will take place in Jacobs Alley next week and it will be necessary to temporarily close the street to traffic. Merchants who park on this street and residents will be notified which days will be affected.
- \* Plans are underway for the installation of an electrical ductbank and vault in the east bound lane of Clifford Street near King Street around the first week in February. Traffic will be diverted around the work on Clifford Street whenever possible with a flagman on site. This work will take approximately two weeks. Streetscape staff will work with merchants whose parking is affected by this project.
- \* The vault on the King Street side of the King and Queen Streets intersection was successfully placed last week. What a feat! Sawcutting for trolley track removal continued along this block between Queen and Broad Streets this week with track removal proceeding next week.
- \* In this *same* block, it has been decided to allow the southbound thoroughfare of **passenger vehicles only** as long as the lane is at least eight feet wide. Trucks and busses are not allowed in this block and must detour by turning right onto Queen Street proceeding to Rutledge Avenue and turning left there to access Broad Street.
- \* Westbound vehicles of *any* type traveling westbound on Queen Street between Meeting and King Streets must follow the detour across King Street and down Queen Street to Rutledge Avenue to access Broad Street. Please do not turn left at the King/Queen intersection. Construction is in the intersection, and it is not safe to make the turn for either the vehicles or the construction staff.
- \* Follow the detours signs when exiting the Simmons Lot or City's Queen St. Garage.

*The greatest thing you can do is surprise yourself.*

Steve Martin
